**ABSTRACT.** *COVID-19 broke out in Wuhan in late 2019. Immediately, the whole nation rallied as one and fought the COVID-19 epidemic, especially grassroots party members, who played an extremely important role in the fight against COVID-19. By playing a pioneering and exemplary role in the fight against COVID-19, community-level Party members have not only practiced the Party constitution and set an example among the people, but also strengthened their flesh-and-blood ties with the people. They have also enhanced the quality of Party building and further maintained the party's advanced nature. However, in the fight against COVID-19, there are still some problems, such as the insufficient understanding of the vanguard and exemplary role of party members at the grass-roots level, the failure to continue the effect of the exemplary role of Party members, and the imperfect construction of grass-roots Party organizations. In order to further deepen the basic unit party member's cutting edge exemplary role, should constantly improve the level of party member's ideological understanding, further optimize the way the influence of the cutting edge exemplary role of party members, strengthen the construction of the grass-roots party organizations themselves, perfect the mechanism of the basic unit party member's cutting edge exemplary role, make the grass-roots party member's cutting edge exemplary role to continue, enhance its influence and staying power in the people.*

**KEYWORDS:** *Fight against COVID-19; Grass-roots Party members; Role model*

## 1. Introduction

"The sea, just show the true character of heroes", the critical moment rushed up, the crisis will come out, is the real Communists. In the fight against COVID-19, grassroots party members have played a pioneering and exemplary role in the front line of the fight against COVID-19, rallied and led the people, and made full use of their role models to win the people's war. This has enabled the Party flag to fly high on the front line of the fight against COVID-19.

## **2. Party member group oneself party spirit analysis**

### ***2.1 The political consciousness of never defecting to party loyalty***

As a party member, we must first be loyal to the Party, loyal to the motherland, loyal to the people, and never betray the Party. Loyalty to the party and never defection from it are never abstract, but concrete. The concrete manifestation is the firm communist belief, supports the party's line, principle and policy, is ready at any time to sacrifice everything, dedicates everything for the Party and the people. Loyalty to the Party and never defection from it are never conditional, but unconditional. Since the moment I joined the Communist Party of China, I must keep in mind my own party membership, observe Party discipline, fulfill my duties as a party member, and consciously play the vanguard and exemplary role of a Party member at all times. To be loyal to the Party and never betray the Party is the basic political consciousness that must have first as a Communist.

### ***2.2 The exemplary role of being a pioneer and willing to give***

A party member is a banner, and a branch is a fortress. In the battle against the epidemic, primary-level Party organizations have given full play to their role as bastions of battle, serving as a bridge and bond between the Party and the masses and leading them to fight the epidemic. In this process, the appeal and influence of grassroots party members appear to be particularly important. Community-level Party members must be courageous and willing to make contributions in order to give full play to their pioneering and exemplary role in the fight against COVID-19, rush to the front line of the most dangerous epidemic, be willing to make contributions, be willing to make contributions, and set a good example among the people. Grass-roots party members who dare to be the first to set an example of willing to contribute can effectively improve the people's centripetal force and cohesion, and jointly fight against difficulties.

### ***2.3 Pursuing the value of serving the people wholeheartedly***

The Communist Party of China is a Marxist political party. The people's character is the most distinctive character of a Marxist political party. Serving the people whole-heartedly is the party's consistent tenet. The CPC is the vanguard not only of the Chinese working class but also of the Chinese people and the Chinese nation. Serving the people wholeheartedly is the fundamental purpose of the Party. All Party members should always uphold the purpose of serving the people wholeheartedly, take serving the people as their own pursuit of value, put the people's interests and needs in the first place, think what the people think, be anxious about their needs, and put the people's interests first. In the battle against COVID-19, grassroots party members have always given top priority to the people's life and health, and fully demonstrated the value pursuit of serving the people wholeheartedly.

### **3. The value analysis of grass-roots Party member's playing the vanguard exemplary role**

#### ***3.1 The most powerful evidence of practicing the Party Constitution and keeping the mission in mind***

The Constitution stipulates that party members must "carry out the Party's basic line, principles and policies, take the lead in reform, opening up and socialist modernization, drive the masses to work hard for economic development and social progress, and play a vanguard and exemplary role in production, work, study and social life." In the face of threats to the safety and health of the Chinese people and damage to China's economic and social development since the outbreak of the epidemic, grassroots party members have stepped forward to give full play to their pioneering and exemplary role, practice the Party constitution, and become the backbone of the fight against COVID-19. This is the most powerful proof that the Communists "never forget their original intention and never forget their mission". The pioneering and exemplary role of grassroots party members has fully proved that the original aspiration of Chinese Communists is to seek happiness for the people, rejuvenation for the country, and always put the interests of the people first.

#### ***3.2 Setting an example and strengthening flesh-and-blood ties with the people***

The power of example is boundless. In the fight against the epidemic, community-level Party members have given full play to their pioneering and exemplary role and set a good example among the general public, thus strengthening their confidence and leading them to defeat the epidemic. As soon as the clarion call for winning the battle against COVID-19 has been sounded, grassroots Party members across the country have actively signed up to join the fight against COVID-19, setting up "vanguard party members" to measure body temperature, set screening points and control traffic. Wherever there is the most danger, party members are taking the lead and setting an example. We will strictly prevent and control the epidemic, jointly prevent and control it, and actively do a good job in the detection, screening and prevention and control of the epidemic. Under the influence of the pioneering and exemplary role of community-level party members, many volunteers have also joined the fight against the epidemic, contributing their share to the victory. The role of community-level Party members in setting good examples among the people has strengthened their flesh-and-blood ties with the people and deepened their understanding of the Party.

#### ***3.3 Strengthen the quality of Party building and maintain its advanced nature***

The exemplary vanguard role of party members is the concrete manifestation of the party's progressiveness. The epidemic prevention and control in the struggle, grass-roots party members to lead the people of anti epidemic, walk in the forefront of the epidemic prevention and control, is the backbone of the outbreak, for the

majority of the people set a good example, give full play to the leading role, backbone role, role models, in the era of pressed to further strengthen the quality of the party's construction and promoting the development of the party's construction to high quality. The vanguard and exemplary role of grassroots Party members is a powerful proof of their lofty ideological consciousness and good self-quality, and fully maintains the party's progressiveness. In the new era, the Communist Party of China is still a party with advanced nature.

#### **4. Analysis of the status quo of grass-roots Party members' exemplary vanguard role in the fight against COVID-19**

##### ***4.1 Some Party members lack sufficient understanding***

In the fight against COVID-19, most community-level Party members have been able to play a pioneering and exemplary role, but a small number of them still lack sufficient understanding of themselves and strong sense of responsibility. Their pioneering and exemplary role has not been well played, and they have not even participated in the fight against COVID-19. This is a manifestation of the weakening party spirit of community-level Party members. Some party members are passive participants in the fight against the epidemic, lack initiative and enthusiasm, do not understand how party members play the exemplary vanguard role, do not know what kind of exemplary vanguard role party members play, do not use the standards of party members to demand themselves, do not have enough understanding of the exemplary vanguard role of Party members.

##### ***4.2 The effect of a model shall not be prolonged***

There is still a problem in the development of the vanguard and exemplary role of grassroots Party members, that is, the effect of the vanguard and exemplary role of party members will not last for a long time. Due to the time and some grassroots party members' unclear understanding of the vanguard role of party members, the scope and depth of grassroots party members' vanguard role is not enough, and the grassroots Party members' vanguard role has not been maximized. Grassroots Party members have played their vanguard and exemplary role, but their influence is relatively small. They have not consciously given full play to the leading role, the backbone role and the bridging role of party members, and have not formed a lasting influence among the people.

##### ***4.3 The construction of grassroots organizations is not perfect***

Primary-level Party organizations are the battle bastions for implementing the Party's line, principles and policies and the basic work for Party building. However, at present, China's grass-roots party organization construction is not perfect, the quality of basic cadres to be improved, the party construction funds are not enough,

the number of party construction activities are not enough, the form is not enough diversification, grass-roots party organizations vanguard model role play there are some problems. In general, the current construction of grassroots Party organizations need to be further improved, in order to play its role as a battle fortress.

## **5. The long-term mechanism construction based on the role play problem**

### ***5.1 To gradually improve the structure of grassroots Party members and raise the ideological level of individual Party members***

At present, the structure of party members at the grassroots level is not reasonable. The number of party members in the middle and the coming year is relatively large. There is a lack of energetic and energetic young party members, and the structure of party members is not reasonable. Grassroots Party members should attract the ideal and passionate young generation to join, and constantly optimize the structure of party members. In addition, the Party branch should carry out a series of educational activities, such as reviewing the activities of taking the Oath of party membership and carrying out a series of party history lessons, so as to strengthen the education of ideals and beliefs and party spirit of grassroots party members. It is necessary to further strengthen the status of party members at the grass-roots level, so that the party members can realize the importance of playing a pioneering and exemplary role in the new era and how to play their pioneering and exemplary role, and gradually improve the ideological level of the party members at the grass-roots level.

### ***5.2 Making innovations in the ways of ideological and political education at the grassroots level and optimizing the ways in which pioneers and models play an influential role***

In order to deepen the vanguard and exemplary role of grassroots Party members, we should constantly innovate the ways and means of grassroots ideological and political education. In the fight against COVID-19, many grassroots Party members have performed advanced and touching deeds. First of all, we should timely praise these advanced figures and hold commendation conferences to enhance the party members' sense of honor. Secondly, we should make full use of all kinds of media, such as weibo, WeChat public account, douyin and other new media, actively publicize the advanced stories of advanced figures, tell their moving stories and noble spirit in the whole society, and set up a learning model for the whole society. In the new era, the ideological and political education methods of grassroots Party members should also keep pace with The Times. In order to give full play to the vanguard and exemplary role of grassroots Party members, it is necessary to make full use of new media technology, broaden and optimize the scope and channels of influence of vanguard and exemplary role of grassroots party members, and establish a long-term mechanism for giving full play to their exemplary role.

### ***5.3 To constantly strengthen the self-construction of grassroots Party branches and improve the mechanism of vanguard and exemplary function of Party members***

Nothing can be accomplished without rules. To strengthen the self-construction of primary-level Party organizations and give full play to their role as battle forts, we must first formulate a good primary-level management system, strengthen the construction of primary-level Party organizations from the institutional level, and stipulate how party members can play their exemplary vanguard role. Primary-level Party organizations should formulate a practical primary-level management system according to the actual situation, and make a detailed description of the number of times they carry out party-building activities. Secondly, we should increase the input of funds to guarantee the construction of basic Party organizations from the material level. In addition, we should constantly improve the quality of community-level Party members and cadres, recruit younger party members, constantly improve the vitality of community-level Party organizations, and give full play to the pioneering and exemplary role of young Party members among the young people. Finally, primary-level Party organizations should strengthen their ties with the people, listen to their opinions and suggestions more often, truly serve the people, and expand the influence of the vanguard and exemplary role of primary-level Party members among the people.

## **6. Summary**

COVID - 19 outbreak is thrown to the era of our problem, but the Chinese under the guidance of the communist party of China, the communist forces led by example, we fear the outbreak of severe challenges, determined to win the epidemic prevention and control of the people's war, total war, war, give full play to the basic-level party organization's fight fortress function and the cutting edge exemplary role of the communists. In the battle against COVID-19, the vanguard and exemplary role of grassroots party members is particularly important. A long-term mechanism should be established to strengthen the flesh-and-blood ties with the general public and strengthen the unity and cohesion of the entire Chinese nation.
