Ethnic unity is not only of great significance to the stable development of the country, but also plays an important role in promoting the development of each ethnic group. All ethnic groups are an indispensable part of the Chinese nation, and the overall interests of all ethnic groups concern the interests of every nation and every individual. Safeguarding ethnic unity is an important condition for China's prosperity, stability and development, and is in the common interests of all people. As General Secretary Xi Jinping has pointed out, "The relationship between the Chinese nation and all ethnic groups is, figuratively speaking, the relationship between a big family and its members, while the relationship between all ethnic groups is the relationship between different members of a big family". The extended family and its members, as well as the members of the family, are closely linked by lips and teeth and share weal and woe with each other in a community of shared destiny. Therefore, the Chinese nation is a community with a shared future. The destiny of all ethnic groups is inseparable from the destiny of the Chinese nation. Only by holding tightly together like pomegranate seeds can we achieve better development by uniting and working together. Building a strong sense of community among the Chinese nation is conducive to maintaining ethnic unity and promoting the common struggle, prosperity and development of all ethnic groups.

4.1 Unswervingly uphold the leadership of the Party

Since the founding of new China more than 70 years ago, under the strong leadership of the COMMUNIST Party of China, the Chinese nation has made a great historical leap forward from standing up, getting rich to becoming strong. In the face of the COVID-19 epidemic, "a major public health emergency with the fastest spread, the widest range of infections and the most difficult prevention and control since the founding of the People's Republic of China", we need to uphold the strong leadership of the COMMUNIST Party of China (CPC) and foster a sense of community with a shared future for the Chinese nation in order to address the risks and challenges. General Secretary Xi Jinping pointed out that "major strategic results have been achieved in the fight against COVID-19, which fully demonstrates the remarkable advantages of the LEADERSHIP of the CPC and the socialist system of China". In the face of the sudden OUTBREAK of COVID-19, our Party's incomparable leadership is the most reliable backbone for the Chinese people when disaster strikes. The socialist system of our country has the extraordinary organizational mobilization ability, overall planning and coordination ability, implementation ability, in the face of disaster, more powerful shows the superiority of China's national system and national governance system. COVID-19 is the worst infectious disease pandemic in the world in the past century. It has severely impacted the economic and social development of countries around the world and tested their national governance. In the face of sudden severe epidemic situation, our party unity led the Chinese people of all ethnic groups, more than in the past 10 months of the time, had a thrilling fight disease war, suffered an arduous historical big test, a huge effort, fight against COVID - 19 outbreak important strategic achievements, created man with a history of disease and a heroic feats. As long as we work together to uphold and improve the socialist system with Chinese characteristics, modernize China's governance system and governance capacity, and make good use of China's institutional forces to respond to major risks, we will be able to withstand the challenges and tests of all risks and make new historical achievements.

4.2 Resolutely safeguarding the interests of the people

In the face of the challenge of the epidemic, the CPC has given top priority to the

safety and health of the people. As General Secretary Xi Jinping has pointed out, "Health is an inevitable requirement for promoting all-round human development, a basic condition for economic and social development, an important symbol of national prosperity and national prosperity, and the common pursuit of the broad masses of the people." In the face of the challenge of the epidemic, putting people's lives and health first has become an important political task for the prevention and control of the epidemic. In order to solve the problem of the cost of medical treatment for the people and make them feel at ease in seeking medical treatment, the state allocated funds immediately to guarantee medical treatment in all aspects. The Party and the government have decided that all confirmed and suspected patients should be treated first and settled later. After the payment of basic medical insurance, serious disease insurance and medical assistance is made in accordance with regulations, the government will partially subsidize the individual's burden, so as to ensure that no one's treatment will be affected by the cost. For severely ill patients, "one case per person" should be implemented to maximize the cure rate and reduce the death rate. In terms of medical staff, xi jinping, general secretary pointed out: "the medical staff are the backbone power to overcome the outbreak, be sure to attaches great importance to their protection, care, love and support from all aspects, so that they always maintain a strong fighting capacity, high morale, energy, sustainable and healthy into victory over the outbreak struggle." The broad masses of the people are the backbone of the Chinese nation's sense of community. During the epidemic prevention and control, our Party firmly upholds the interests of the people, gives top priority to the safety of people's lives, and enhances the strong identification of the people's groups of all ethnic groups with the motherland, thus strengthening the Chinese nation's sense of community.

In the more than 5,000 years of development of the Chinese nation, the Chinese people have not only created a splendid culture, but also formed a great national spirit of unity and unity, love of peace, diligence, courage and constant self-improvement with patriotism at its core. General Secretary Xi Jinping has pointed out that the Chinese people are people with a great spirit of creativity, a great spirit of struggle, a great spirit of unity and a great dream. In the current COVID-19 prevention and control efforts, the great national spirit has demonstrated its great strength and promoted the great national spirit, which is the key force for us to win the war without smoke. In the fight against COVID-19, General Secretary Xi Jinping has personally directed and made arrangements, and people across the country have worked together to help each other in times of difficulty. In a relatively short period of time, the spread of COVID-19 has been contained, the situation has been stabilized, and the situation has been reversed. As a Chinese saying goes, "When one party is in trouble, support comes from all sides". In the face of the

epidemic, China has told a remarkable story of "uniting against the epidemic", which has won the respect and support of the international community and fully demonstrated the great spirit of solidarity. The people's war against COVID-19 has demonstrated China's great spirit of solidarity in the fight against COVID-19. It is China's strength to face up to its responsibilities, to think in one place, to act with all its might, and to carry out mass defense and mass governance to the end. This is China's strength to overcome all difficulties and obstacles. "I've never seen this kind of mobilization in my life." WHO Director-General Tedros Adhanom Ghebreyes spoke highly of China, saying, "The speed and scale of China's actions are rare in the world, demonstrating China's speed, China's scale and China's efficiency." These are the advantages of China's system.
